Considerations:

- Oracle Developer is a programmer with Oracle Developer 2000 Framework experience
- Manual Tester is a tester doing white box testing
- PM position does not include PMP Certification

SERVICE DELIVERY

AVERAGE PRICES

In overall, resources allocated in one of our delivery centers in Mexico cost 30% less than average prices in the United States.

For onshore/onsite rates additional charges apply.

ENGLISH PROFICIENCY

All resources at least have an English speaking proficiency level 3 on the Interagency Language Roundtable (ILR) Proficiency Scale, developed by the United States Foreign Services Institute, also known as the FSI Scale.

ILR Level 3 is considered to be "professional working proficiency"

A person at this level is described as follows:

- able to speak the language with sufficient structural accuracy and vocabulary to participate effectively in most formal and informal conversations on practical, social, and professional topics
- can discuss particular interests and special fields of competence with reasonable ease
- has comprehension which is quite complete for a normal rate of speech
- has a general vocabulary which is broad enough that he or she rarely has to grope for a word
- has an accent which may be obviously foreign; has a good control of grammar; and whose errors virtually never interfere with understanding and rarely disturb the native speaker.
